EDUCATION

California State Polytechnic University, Pomona

B.S. in *Computer Science*, Minor in *Data Science* | May 2026

Relevant Coursework: Linear Algebra, Data Mining, Big Data Analytics and Cloud Computing, Machine Learning and its Applications, Probability and Statistics, Fundamentals of Data Science, Algorithms and Data Structures

Competitions: ITC 2025 (1st place), ITC 2024 (1st place), DS&AI Hackathon (3rd place), ITC 2023 (3rd place)

Leadership: Marketing Manager (Google Developer Clubs), Director of Data Analytics (CPP MISSA), Professional Development (AKPSI)

PROFESSIONAL & LEADERSHIP EXPERIENCE

Avanade | *Data Engineering Intern*

June 2025 - Sep 2025

- Designed and documented machine learning workflows by building automated data pipelines and deployment systems across cloud and on-premise platforms, enabling reproducibility, scalability, and faster onboarding for cross-functional teams
- Automated financial analytics reporting by building a Power BI dashboard with 12-hour refresh cycles that consolidated and cleaned multi-source expense records, improving data timeliness and accuracy while accelerating financial review processes

Navi Technologies Inc. | *Data Science Intern*

March 2025 - June 2025

- Built and automated end-to-end data pipelines for ingesting, cleaning, and aggregating city-level safety and mobility data from 5+ public and proprietary sources, reducing data latency by 35% and enhancing reliability for live hazard detection models.
- Transformed user interaction data into actionable UX insights by analyzing session replays and click patterns, creating data-driven reports that guided prototype iterations and boosted homepage engagement by 15%

Boeing | *Data Analyst Consultant*

Jan 2025 - May 2025

- Led a team of 7 to analyze global air travel data, comparing Boeing and Airbus passenger trends; identified regional demand patterns that guided fleet planning and market growth strategies.
- Designed and deployed Power BI dashboards analyzing 1M+ flight records across 40 countries, enabling Boeing leadership to visualize market recovery trends and forecast regional demand with 90% accuracy.

Cyber Adaptive Learning System Laboratory | *Research Assistant*

Aug 2024 - Present

- Developed and optimized Python-based web scraping pipelines (Selenium, BeautifulSoup) to extract 500+ structured vendor records, improving collection efficiency by 35% and enhancing data reliability for downstream analytics.
- Built social network models using GraphX from 5,000+ dark web threads and applied Graph Neural Networks (GNNs) to analyze 10,000+ user interactions, identifying top 5% most influential users and uncovering actionable insights in online information flow.

Management Information Systems Student Association | *Director of Data Analytics*

May 2024 - Present

- Leading MISSA's 23-member Data Analytics Team by delivering workshops on SQL, Tableau, Python, and machine learning, while overseeing cross-industry analytics projects through strategic task delegation, progress updates, and team collaboration.

Southern California Edison | *Data Analyst Consultant*

Jan 2024 - May 2024

- Spearheaded a team of 5 analysts to analyze historical energy trends and customer consumption across 15 SCE counties.
- Built SARIMAX and Logistic Regression models leveraging time-series data to forecast regional energy demand with 15% higher accuracy and 20% improved predictive precision for Q1–Q2 2025.

PROJECTS

Small Business Administration (SBA) Loan Default Risk Analysis and Prediction

May 2025

- Analyzed 800,000 historic SBA loan records to develop a segmented allocation strategy, enhancing partnerships with 200,000 reliable payers and reducing high-risk defaults by providing proactive support to improve repayment rates by 11%.
- Designed 11 data visualizations and an interactive dashboard by leveraging MySQL to extract subsets of data and Tableau for visualization, delivering actionable insights to showcase trends and insightful patterns between repaid and defaulted loans.

Cycle Care Biking Membership Retention Analysis and Prediction

Apr 2024

- Processed over 5 million customer interactions to uncover behavioral patterns between members and non-members, identifying trends to propose a marketing strategy that drove a projected 15% increase in sign-ups and a 20% boost in member retention
- Developed 15 data visualizations and 2 interactive dashboards through Power BI to effectively highlight trends, patterns, and relationships between members and non-members, improving campaign targeting by 30% and reducing churn by 10%

SKILLS

Machine Learning: Regression, Classification, Clustering, Dimensionality Reduction, Ensemble Methods, Deep Learning

Programming Languages: Python, Java, C++, HTML/CSS, JavaScript

Data Analysis & Engineering: SQL, Python (Pandas, NumPy, Matplotlib, scikit-learn), Tableau, Power BI, ArcGIS, Excel, Figma, ETL Pipelines, Data Warehousing, API Integration, A/B Testing, Statistical Modeling, Azure
