Implementation Plan

01

Executive Overview

Current Standing

Strengths

- Diverse bicycle options for **all** ages, including **disabilities**
- Strong community **engagement** and **brand identity**

Weaknesses

- Challenges in **differentiating** rider behavior and **maintaining** a diverse fleet
- **Dependency** on local market conditions

Opportunities

- Technology **integration** for user experience and efficiency
- **Partnerships** and **sponsorships** for community ties

Threats

- **Competition** from larger companies
- Financial **pressure** from maintenance and weather uncertainties

Our Focus

1.

Differentiating usage patterns between member and non-member riders

2.

Facilitating conversion of non-member riders to members

3.

Utilizing data-driven marketing strategies

Our Goal

Increase **annual memberships** by converting non-member riders into loyal members, leveraging data-driven **insights** for targeted **marketing**.

02

Our Process

Data Analysis Process

Hypothesizing Trends

To create effective visualizations, we first need to understand what information we want to convey. We achieved this by:

Formulating Relevant Questions

Deciding which factors to compare

Data Visualization

Cleaning Data

- Removed null values and errors
- Created new columns to better facilitate analysis

Choosing Method of Visualization

- Utilized Python's libraries like Matplotlib, Geopy, and Plotly Express

Choosing Correct Visualizations

- Data is mostly categorical, scatter plots and regression will not be effective
- Bar charts and maps are more effective in visualizing this categorical data

Analysis & Application

*Conducted a thorough analysis of the data, correlating the identified trends with external research to **validate** our findings and **ensure** their relevance and accuracy.*

Research & Insights

01

Population

Third-most populous city in the US: 2.7 million residents

03

Biking Infrastructure

Over 200 miles of on-street bike lanes and off-street trails

The City of Chicago

02

Tourist Destination

Over 58 million tourists annually

04

Attractions

Over 60 museums, 200 theaters, and 26 miles of lakefront

Membership Distribution

Membership Distribution:

- Members: 54.8%
- Non-Members: 45.2%

Targeting Specific Demographics:

- Enables tailored marketing campaigns
- Maximizes campaign effectiveness

Bike Model Distribution

Bike Model Distribution:

- Classic Bikes: 58.11%
- Docked Bikes: 5.58%
- Electric Bikes: 36.31%

Insights for Marketing:

- Emphasize benefits of classic bikes
- Promote convenience of electric bikes

Bike Station Locations

Northern and central Chicago have a higher concentration of customer activity compared to the outskirts and suburban areas

Most Frequent Bike Station Locations

Red = Most Frequent Stations for Members
Gray = Most Frequent Stations for Non-Members
Blue = Most Frequent Stations for Both

Members tend to bike more in the inner city, while non-members prefer lakeside routes, indicating different biking preferences between the two groups

Red Stations	Gray Stations	Blue Stations
- Broadway & Barry Ave - Clark St & Elm St - Clinton St & Madison St - Dearborn St & Erie St - Desplaines St & Kinzie St - Green St & Madison St - Kingsbury St & Kinzie St - St. Clair St & Erie St - Wells St & Huron St	- Clark St & Lincoln Ave - Indiana Ave & Roosevelt Rd - Lake Shore Dr & Monroe St - Lake Shore Dr & North Blvd - Michigan Ave & Oak St - Millennium Park - Shedd Aquarium - Streeter Dr & Grand Ave - Theater on the Lake - Wabash Ave & Grand Ave	- Wells St & Concord Ln - Wells St & Elm St

Why is this?

Map of Tech Companies

Source: Chicago Business

Map of Tourist Attractions

Source: 360 Chicago

Members likely choose inner city stations due to their proximity to companies, indicating a practical commuting choice

Non-member riders, likely tourists or occasional visitors, tend to use bike stations near tourist destinations

Day of the Week

Weekday Activity (Members):

- Most active during weekdays
- Likely commuting to work or school
- Suggests regular use as part of daily routine

Weekend Activity (Non-Members):

- Higher activity on weekends
- Indicates leisure or tourism use
- Aligns with hypothesis of non-members as tourists or occasional visitors

Time of Day

Weekday

During weekdays, the number of rides peaks at 8am and 5pm, coinciding with typical commuting times when people are leaving for work or returning home

Weekend

On weekends, ride numbers increase around 10am and remain higher than members' rides until 6pm, likely due to weekend leisure and tourism activities

Time of Year

Peak Months (June to September):

- Most profitable period for both casual riders and members
- Highest rider counts observed

Off-Peak Months (November to April):

- Least popular months
- Lowest rider counts recorded

Why is this?

Source: National Weather Association

This trend aligns with Chicago's average weather, indicating that warmer months have more favorable biking conditions. Marketing efforts during peak months may be more effective, as users are less likely to bike when it's snowing or conditions are bad

Duration of Bike Ride

The longer average ride duration for non-members implies they may use the bikes for leisure or longer trips, while members likely use them more for regular commuting or shorter, more frequent trips.

04

Marketing Approach

Marketing Approach

Identify a Target
Audience

01

02

Understand Our
Competitors

Explore Customer
Alternatives

03

Target Audience

Leisure and Tourism Focus

Attract leisure riders and tourists, showcasing the city exploration experience

Commuter Promotion

Highlight membership benefits for commuters, emphasizing cost-effectiveness

Seasonal Promotions

Promote off-peak ridership and offer summer plans during peak months

Focus

Competitor Analysis

	Single Ride \$1 + \$0.18/min	Day Pass \$18.10/day	Divvy \$143.90/year	Lyft Pink \$199/year
Classic Bike Prices	\$1 unlock + \$0.18/min	3 hours free, then \$0.18/min	45 min free, then \$0.18/min	45 min free, then \$0.18/min
Scooter Prices	\$1 unlock + \$0.44/min	Free unlocks + \$0.44/min	Free unlocks + \$0.29/min	Free unlocks + \$0.29/min
Ebike Prices	\$1 unlock + \$0.44/min	Free unlocks + \$0.44/min	Free unlocks + \$0.18/min	Free unlocks + \$0.18/min
Bike Angels				
Rideshare Benefits				

Divvy Bikes

- Monopoly in Chicago's bikeshare market
- Boasts a fleet of 5,800 bikes across 580+ stations citywide
- Service area covers 234 square miles, providing extensive commuter options
- Partnered with Lyft to expand its services
- Operates a "Bike Angel" program that rewards users for redistributing bikes
-

Customer Alternatives

Walking

- Free
- Takes a long time
- 4.5x slower than cycling

Owning own bike

- Initial cost of \$100-\$500
- 200 bikes stolen a month
- Secure locations for bike

Cars

- Expensive initial cost
- Find/pay for parking
- \$800 maintenance a year

Chicago Transit Authority

- Accessible public transportation
- Metro, \$2.50
- Buses, \$2.25

Now that we have a clear understanding of our target audience, competitors, and alternatives, we can develop a more detailed and thoughtful marketing plan that effectively positions our offerings in the market.

05

Marketing Strategy

Marketing Strategy

Membership Benefits

1.

Priority Reservations

- Data shows increased bike usage during 8AM and 5PM
 - Implement a reservation system allowing users to reserve bikes ahead of time
 - Enhances member experience, attracts new members
-

2.

Referral Rewards

- Utilize the satisfaction of current members to promote the program
 - Encouraging referrals from satisfied members brings in fresh participants
 - Strengthens program participation through engagement
-

3.

Loyalty Program

- Members earn points for rentals, with more points for longer or frequent rentals
 - Points can be redeemed for discounts on future rentals, free upgrades, or exclusive merchandise
-

Tailored Services

Day Passes Package

1

Day Passes available June-September, aligning with peak engagement

2

Offers unlimited bike rentals for 1, 3, 5, or 7 days, ideal for exploring the city

3

Provides short-term membership benefits

4

Includes 3-hour daily usage allowance and city guide

Tailored Services

Off-Season Membership

1

Offers locals and commuters a cost-effective transportation solution during colder months and provides up to 1 hour of bike usage per day

2

Aims to convert short-term users into long-term members

3

Differentiates from competitors like Divvy by offering seasonal discounts

Company Partnerships

Food Delivery Service

Expand Cycle Care Biking's customer base

Convenient working environment for the food delivery personnel

Potential partnership opportunities and increased brand visibility

Company Partnerships

Chicago Tour Company

Tourism service in Chicago where customers can go to find local attractions, create a travel itinerary, and plan guided tours

Company Promotion

Members: Prefer classic bikes and located near office buildings

Example promotion done by VELOlove

Targeted Advertisement:

Place advertisements and billboards near office buildings

- **Highlight** convenience, time savings, parking avoidance, and health benefits of using bikes
- **Prioritize** availability of classic bikes at inner city stations

Company Promotion

Non-Members: Located near tourist locations

Example promotion done by DIVVY

Targeted Advertisement:

Place advertisements and billboards near tourist attractions

- **Highlight** scenic routes and nearby bike stations
- **Emphasize** convenience and leisure aspects to attract non-members

Company Promotion

Chicago Bike Day:

- Inspired by successful events in big cities like New York
- Boosts summer participation and community connections

We aim to create an engaging event that strengthens community bonds and enhances the summer experience

Events Details:

- Date: June 3rd, World Bicycle Day
- Location: Grant Park, Chicago

Grant Park's reputation for hosting major city events like the Taste of Chicago and Lollapalooza ensures high visibility for our event

Chicago Bike Day Strategy

Company Promotion

Social Media Influencers

Kayla Jeter

Micro-Influencer:

- 7,611 average views per post
- Based in Chicago

Kimberly Spears

Nano-Influencer:

- 5,121 average views per post
- Based in Chicago

Increase popularity of influencer as we gain more members
