INTRODUCTION

The Cinema Industry

From the early era of silent film to today's high-tech movies, cinema has been a significant part of people's lives. Cinema possesses the ability to tell visually compelling stories which forge an emotional connection with the viewers while also deeply resonating with them.

This project delves into the most pivotal components essential for crafting a successful film. By closely examining these elements, the aim is to offer crucial insights to film studios, enabling them to integrate audience preferences into their future projects, ensuring resonance and success.

02

Dataset and Problem

Dataset

Top 1000 Highest Grossing Movies

- ★ Obtained a dataset with movie data ranging from 1973 - present
- ★ Dataset contains 1000 rows listing the 1000 highest grossing movies
- ★ Consists of 14 rows of which: Title, Distributor, Budget, World Wide Sales, Release Date, Genre, Running Time & License were used
- ★ Additional Information:
 - 10.00 Usability Score
 - Updated Annually (last on Sept. 25, 2023)

Problem

Count of Movies by Studios

graph shows a skewed distribution among movie studios

Notably, major studios makes up 77% of the top 1000

dataset's distributor count underscores the dominance of these key players

CINEMA

Why is this a problem

★ Dominance of specific distributors in the box office creates a competitive imbalance

★ Limits the diversity of films available to audiences

★ Concentration of power can stifle creativity within the film industry

★ Hinders the emergence of fresh voices in filmmaking

Research Question

What strategies can emerging and lesser-known studios employ to enhance their revenue streams?

- ★ Are there specific genres that consistently perform well?
- ★ Does a higher budget correlate with higher revenue?
- ★ Are there specific months or seasons that tend to result in higher revenue?
- ★ Are longer or shorter movies more likely to generate higher revenue?
- ★ Does the License of a movie affect its revenue?

03

Process

Data Cleaning

Eliminated redundant values

Adjusted typos, refined syntax, and improved grammar

Filled empty cells with "NULL"

Formatting of Data

Structuring data into more sophisticated tables

Removing unwanted columns
